

PARTNER / INVESTOR BRIEF

Main window (anonymized example)

A wedge into mission-critical sonar workflows.

SonarScout is decision support for public safety sonar review: offline-first, court-ready exports, and a clear expansion path from Garmin-first to broader manufacturers.

Clear positioning

Built for public safety: law enforcement, fire/rescue dive teams, training providers.

Differentiation

Offline-capable + evidence-grade reporting — designed for sensitive operations.

Expansion path

Vendor-agnostic retrofit once representative training data is available.

Partnership-ready

Resellers, integrators, and validation partners accelerate adoption and data coverage.

Why it matters

- AI reduces review time and cognitive load
- Standardized reporting improves defensibility
- Offline-first reduces deployment friction
